WHEN IT COMES TO SAFETY, TRI-MOUNTAIN MAKES YOU THE

CENTER OF ATTENTION.

There's a reason work zone injuries are decreasing annually - more businesses are requiring their workers to wear safety gear that helps them stand out and stay safe. Hazardous traffic, heavy equipment and inclement weather are just a few things that are a part of the job for many workers. Making those workers seen and protected from on-the-job injuries is just a part of our job. With 28 different high-visibility products including ANSI Class 2 and Class 3 certified styles, our collection is simply the perfect safety accessory for the men and women whose hard work isn't always noticed.

ANSI class 3 is for use in the most severe environment. These workers need the highest level of visibility. Class 3-certified styles offer the greatest amount of fluorescent and reflective material.

ANSI class 2 is for moderately severe environments. These workers are on job sites with traffic that travels over 25 mph with a complex background. Class 2-certified styles offer a balance of fluorescent and reflective materials.

Our basic highvisibility safety clothing is color enhanced to add extra safety for those workers involved in low-risk activities

MAKING SAFETY THE STANDARD

The American National Standards Institute (ANSI) is a non-profit organization devoted to ensuring the health and safety of consumers and the protection of our environment. Working with the International Safety Equipment Association (ISEA), ANSI developed the accepted standard outlining performance requirements for the visibility of safety apparel - ANSI/ISEA 107-2015. This standard specifies how much fluorescent background materials must be used, minimum areas

for retroreflective surfaces, minimum washing cycles and outlines test methods for materials. Our safety styles have been certified by independent laboratories to meet ANSI's latest standards for high visibility workwear, ANSI/ISEA 107-2015. As ANSI standards require, we have categorized our safety apparel into three Performance Classes based on task load, nature of the work, environment and lighting conditions.

CHEST: Measure just under the arms, across the fullest part of chest, around shoulder blades holding tape firm and level.

WAIST: Measure around your natural waistline, keeping one finger between the tape and the waist.

HIP: In standing position, measure around the fullest point of hips.

Every woman's body is unique. For best results, ask your authorized Tri-Mountain dealer to help you obtain a full-size run to try on in person.

*Detailed size specs on each style are available upon request.
