

TRI-MOUNTAIN

2018 COLLECTION

**SAFETYWEAR &
WORKWEAR**

SAFETYWEAR

WHEN LIVES DEPEND ON IT,
QUALITY IS PARAMOUNT

WHEN IT COMES TO SAFETY, TRI-MOUNTAIN MAKES YOU THE CENTER OF ATTENTION.

There's a reason work zone injuries are decreasing annually - more businesses are requiring their workers to wear safety gear that helps them stand out and stay safe. Hazardous traffic, heavy equipment and inclement weather are just a few things that are a part of the job for many workers. Making those workers seen and protected from on-the-job injuries is just a part of our job. With 28 different high-visibility products including ANSI Class 2 and Class 3 certified styles, our collection is simply the perfect safety accessory for the men and women whose hard work isn't always noticed.

ANSI class 3 is for use in the most severe environments. These workers need the highest level of visibility. Class 3-certified styles offer the greatest amount of fluorescent and reflective material.

ANSI class 2 is for moderately severe environments. These workers are on job sites with traffic that travels over 25 mph with a complex background. Class 2-certified styles offer a balance of fluorescent and reflective materials.

Our basic high-visibility safety clothing is color enhanced... to add extra safety for those workers involved in more low-risk activities.

MAKING SAFETY THE STANDARD

The American National Standards Institute (ANSI) is a non-profit organization devoted to ensuring the health and safety of consumers and the protection of our environment. Working with the International Safety Equipment Association (ISEA), ANSI developed the accepted standard outlining performance requirements for the visibility of safety apparel - ANSI/ISEA 107-2015. This standard specifies how much fluorescent background materials must be used, minimum areas for

retroreflective surfaces, minimum washing cycles and outlines test methods for materials. Our safety styles have been certified by independent laboratories to meet ANSI's latest standards for high visibility workwear, ANSI/ISEA 107-2015. As ANSI standards require, we have categorized our safety apparel into three Performance Classes based on task load, nature of the work, environment and lighting conditions.

EMB

EMBROIDERY

We first launched our Worry-Free Embroidery® Service in 2008 and this classic decorating method continues to be the most popular decoration choice.

**HT**

HEAT TRANSFER

Pre-printed art is pressed onto the garment. This process has been improved and refined over the years and is a great decoration option for performance apparel.

**LZR**

LASER ETCHING

Using laser technology, the top layer of a garment is burned slightly, creating a precise, tonal design. A versatile option for varying logo sizes and locations.

**BHT**

BORDERLESS HEAT TRANSFER

Tri-Mountain's Borderless Heat Transfers provide all the benefits and features of the standard heat transfer, digitally printed in full color, but with a clean, borderless edge.
