

DONE RIGHT.

MORE THAN JUST A SLOGAN. IT'S A WAY OF LIFE.

Here's to the early risers. The heavy lifters. The people who believe there's only one way a job should be done — and that's DONE RIGHT. We've been outfitting these hard workers since 1923 in everything from shirts, pants and overalls to lab coats and butcher wraps.

So, here's to the people who do the tough jobs. The challenging jobs. The messy jobs. The bending, twisting jobs. The jobs that make you think on your feet. For those of you who take great pride in your work and the people you work alongside, we make Red Kap® for all of you. And we'll continue, for as long as there are people who never quit, who go to work before the sun comes up and head home for dinner long after the sun's gone down.

WOMEN'S COMPANION PIECE AVAILABLE

Garments on pages 14-64 featuring this icon have a female companion piece located in the Women's Workwear section on pages 80-91.

TOUCHTEX™ TECHNOLOGY

Superior color retention, soil release and wickability.

TOUCHTEX PRO™

Same features as Touchtex™ but with an even softer hand. Available on bottoms only.

YARN DYED STRIPES

Yarns are dyed then woven into a striped configuration.

DURABLE PRESS

Minimum pressing or ironing required. Fabric contains a wrinkle-resistant finish.

NO BUTTONS

This garment has no buttons that will fall off or catch.

UV BUTTONS

Non-yellowing buttons for long-lasting whiteness through industrial laundry processing.

HYDROPHILIC MOISTURE MANAGEMENT SYSTEM

Technical term meaning moisture wicking. Wicks perspiration away from the skin and spreads it over the fabric face. It then quickly evaporates, allowing the wearer to stay cool, dry and comfortable.

ROKAP

A Red Kap" term for our no-roll waistband. This garment has enhanced engineering to withstand industrial laundry stress and abrasion. The waistband has a mesh inner lining inside to reduce breakdown in fabric fibers, giving the pant a permanent crease even after industrial laundering.

WORK NMOTION® FABRIC

Created exclusively for Red Kap* and provides permanent comfort during wear with memory stretch yarns for added flexibility.

STRETCH CANVAS

The industry's first Industrial Stretch Canvas is extra tough but wears comfortably all day long.

SIDE-VENTED STRAIGHT HEM

Versatile straight hem offers a clean professional look whether tucked in or worn out.

ZEROSKRATCH™ APPAREL

Paint jobs and surfaces stay scratch free thanks to strategically-designed garment features that keep buttons and snaps under wraps.

RIPSTOP FABRIC

Lightweight yet extra durable ripstop fabric keeps rips and repairs to a minimum.

OILBLOK TECHNOLOGY

Repels oil and oil-based fluids keeping garments looking new, longer – and it's only available from Red Kap*.

DURABLE WATER REPELLENT (DWR) FINISH

Repels water and water-based liquids while decreasing dry time nearly 30% compared to other non-treated twill workwear fabric.

TRUBLACK

Our 65% Polyester / 35% Cotton Black fabric resists fading wash after wash.

CLASSIC FIT

This fit features a traditional rise that sits at the natural waist. Slim through the seat and thigh with a slimmer leg opening that will fit over work boots.

RELAXED FIT

Our relaxed fit jeans feature a traditional rise that sits at the natural waist. Relaxed seat and thigh offer more room for mobility, and the slightly tapered leg fits over work boots.

LOOSE FIT

This fit features an updated rise that sits slightly below the waist. It is cut through the seat and thigh to offer maximum comfort and ease of movement. The straight leg fits over work boots.

STRAIGHT FIT

Our straight fit features an updated rise that sits slightly below the waist. It is slim through the seat and thigh with a leg opening that fits over work boots.

MODERN FIT

Modern fit with updated rise sits slightly below the natural waist. It is slim through the seat and thigh with a slightly tapered leg opening that fits over work boots.

WASH CODES

HI-VISIBILITY TYPE O CLASS 1 - OFF-ROAD

Intended for use in environments where there are struck-by hazards from moving vehicles, equipment and machinery <u>not</u> operating on public access rights of way or temporary traffic control zones.

HI-VISIBILITY TYPE R CLASS 2 - ROADWAY

Intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 2 garments require the use of greater amounts of high-visibility materials which help distinguish between a human and an inanimate object.

HI-VISIBILITY TYPE R CLASS 3 - ROADWAY

Intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 3 garments mandate an even higher standard of visibility for workers in moving, complex backgrounds.

HI-VISIBILITY SUPPLEMENTAL CLASS E

Pants, bib overalls, shorts and gaiters meeting minimum area requirements for background material and retroreflective trim. Class E apparel, however, cannot be worn alone to provide adequate visibility of workers. When Class E items are worn with Performance Class 2 or 3 apparel, the overall classification of the ensemble is Performance Class 3.

UPF 40 RATING

Ultraviolet Protection Factor - A rating designed for fabric and clothing that specifically measures the level of sun protection. UPF measures both UVA and UVB rays.

FIT CHART ICONS

MEN'S FIT CHART (MFC)

The "M" represents "Men's" and is followed by the corresponding number of the specific Men's Fit Chart on pgs.163-167.

WOMEN'S FIT CHART (LFC)

The "L" represents "Ladies" and is followed by the corresponding number of the specific Women's Fit Chart on pg. 162.

IL-HS (HEAVY SOIL)

This method of industrial laundering is commonly used to remove heavy soil with a combination of higher water temperature (160°F max) and harsher chemistry; pH should be held to 11.5 max. More aggressive wash formulas may be necessary to remove heavy soils but may result in accelerated color loss, deterioration in performance of retroreflective trim and overall reduced garment service life.

IL-OB (OILBLOK)

This new method of industrial laundering is specifically used for garments with Red Kap's exclusive OilBlok Technology finish. Water temperatures of 140°F or less with a max temp of 150°F and cleaning agency with moderate pH (9.0 max) are used to remove heavy soil without negatively affecting the finish. As with Heavy Soil Industrial Laundering, accelerated fading, increased shrinkage and reduced service life may occur.

IL-LS (LIGHT SOIL)

This less aggressive industrial laundering process is commonly used on uniforms which are lightly soiled or made of fabrics that are not designed to withstand higher wash temperatures or harsher chemistry. In a typical light soil formula, water temperatures are usually held to a maximum of 140°F and pH to 10.5 max.

Transform an ordinary uniform program into an **EXTRAORDINARY** UNIFORM PROGRAM.

Through our Imagine It * program, we have taken the capability of creating customized uniform items and apparel to a new level. The possibilities are countless.

Decorate it. Modify it. Customize it.

This unique program allows you to select stock apparel from our many brands and modify or customize them to create uniforms that cater directly to your needs. A red collar overlay, a decorative trim on the cuffs or the addition of reflective striping to a coverall are a few examples of the possibilities that can make your purchases unique. Contact your sales representative for more information.

FABRIC THAT WORKS FOR YOU

We offer a wide variety of high-quality, durable fabrics made to withstand the wear and tear endured on any jobsite. Whether you're looking for added comfort, durability or a little bit of both, we've got the fabric that suits your needs. And it's Red Kap®, so you know it's Done Right.

RIPSTOP

Helps stop rips even after they start • Industrial-friendly poly/cotton blend fabric is extra durable yet lightweight • Superior color retention, soil release and wickability • Stronger than traditional workwear fabric

65% POLYESTER / 35% COTTON 80% POLYESTER / 20% COTTON

Poly-rich fibers deter dust and debris • Breathability and comfort of cotton • Strength and durability of polyester • Lightweight for comfort • Provides excellent color retention

100% COTTON

All natural fibers offer breathability \circ Twill weave adds strength \circ Easy care, wrinkle-resistant finish \circ Lightweight for comfort \circ Soft hand and easy drape on the body

100% SPUN POLYESTER

Strong fibers that stand up to wear and tear ° Fibers have more "give" than natural fibers, offering more comfort and mobility ° Provides excellent color retention ° Processes faster through all wash cycles ° Fibers deter dust and debris

ANTI-STAT

Low lint fabric • Lightweight fabric with roomier fit for added comfort on the job • Grippers at sleeves and at neck for extra coverage when needed • External chest and hip pockets for additional storage

WORK NMOTION

Memory Stretch yarns for added flexibility • Inherent stretch adds additional comfort • Excellent stretch recovery at stress points (elbows and knees) • Bartacks at all stretch points for added durability

By analyzing and understanding the relationship between movement of the human body and how clothing inhibits range of motion, Red Kap* has designed an apparel solution that increases freedom of movement without sacrificing durability. Red Kap* with MIMIX** revolutionizes workwear apparel by providing optimum comfort and mobility for physically active people. MIMIX** flex panels are placed where the greatest impact can be made to your mobility, efficiency, and performance.

Built for the way you move.

Bend, stretch, squat and reach without your clothes holding you back.

Specially designed **FLEX PANELS** increase your freedom of movement.

Durable **RIPSTOP FABRIC** on work shirts is **75% STRONGER** than other poplin work fabrics.

PREMIUM, PROFESSIONAL LOOK improves customer perception and fosters employee pride.

MOISTURE WICKING FINISH on work shirts draws moisture away from the body.

PERFORMANCE STRETCH FABRIC provides ADDITIONAL BREATHABILITY where you need it most.

Red Kap® Work Shirt with (**) MIMIX®

The specially-placed flex panel provides maximum mobility and is made with a lightweight mesh fabric that is extra durable and breathable too.

TOUCHTEX™ TECHNOLOGY with superior color retention, soil release and wickability.

Industrial-friendly **RIPSTOP** FABRIC is 75% STRONGER than other poplin workwear fabrics.

INTRODUCTION TO THE ANSI HI-VISIBILITY STANDARD

The American National Standard for High-Visibility Safety Apparel and Accessories (ANSI/ISEA 107-2015) is a standard established by the American National Standards Institute. Construction, maintenance, utility, emergency responders, airport ramp personnel and many categories of off-road workers are routinely exposed to potential injury hazards from their low visibility while on the job.

This standard provides guidelines for the selection and use of high-visibility safety apparel and other high-visibility accessories to improve worker visibility during the day, in low-light conditions, and at night.

Private companies, as well as various federal, state, and local authorities have embraced ANSI/ISEA 107-compliant garments and accessories as useful PPE (Personal Protective Equipment) for workers exposed to struck-by hazards.

ANSI / ISEA 107-2015 SPECIFIES THE FOLLOWING CRITERIA MUST BE MET:

- PERFORMANCE REQUIREMENTS
 FOR BACKGROUND AND
 COMBINED-PERFORMANCE
 RETRO-REFLECTIVE MATERIALS
- PHOTOMETRIC AND PHYSICAL
 PERFORMANCE REQUIREMENTS FOR
 RETRO-REFLECTIVE AND COMBINED PERFORMANCE MATERIALS
- GARMENT DESIGN
- PROPER LABELING

FINAL RULE

The Final Rule, 23 CFR Part 634 Worker Visibility, was passed on November 18, 2006, and took effect on November 24, 2008.

The Rule states that all workers within a right-of-way of a Federal-aid highway who are exposed to traffic or to construction equipment within the work area shall wear High-Visibility apparel that must meet Performance Class 2 or Class 3 requirements of ANSI/ISEA 107-2015.

The Federal Register Final Rule and revised document of the 2009 Manual on Uniform Traffic Control Devices (MUTCD) was released on December 16, 2009.

The Rule states that mandatory use areas are expanded beyond Federal-aid highways and will require all workers on or near the roadway right-of-way to wear high visibility safety apparel that meets Performance Class 2 or 3 of ANSI 107-2004 or equivalent revisions. The Federal Highway Administration has issued a formal interpretation recognizing the 2015 edition of ANSI/ISEA 107 as meeting the requirements of 2009 MUTCD.

ULTRAVIOLET PROTECTION FACTOR (UPF) RATING

A relatively new rating designation for sun protective textiles and clothing is UPF (Ultraviolet Protection Factor). Unlike SPF (Sun Protection Factor) that measures only UVB, UPF measures both UVA and UVB.

Sun protective clothing is clothing specifically designed for sun protection and is produced from a fabric rated for its level of ultraviolet (UV) protection. Sun protective clothing may be pre-treated with UV inhibiting ingredients during manufacture to enhance UV blocking capacity.

BE SURE TO LOOK FOR THE UPF 40 IGON TO SEE WHICH RED KAP' PRODUCTS ARE MADE FROM FABRIC THAT CAN HELP PROTECT YOU FROM HARMFUL UV RAYS.

UPF Rating based upon testing performed on dry fabric, prelaundered. Test data available upon request.

RECENT CHANGES TO THE ANSI STANDARD

ANSI/ISEA 107 AND ANSI/ISEA 207 HAVE BEEN COMBINED INTO ANSI/ISEA 107-2015

ANSI/ISEA 107 and ANSI/ISEA 207, American National Standard for High-Visibility <u>Public Safety Vests</u>, were merged to form a single document, ANSI/ISEA 107-2015. This new consolidated standard covers the needs of workers in all industries for high visibility garments as well as synchronizes the revision schedules for these two previously separate documents.

ALLOWANCE FOR SMALL SIZED GARMENTS

Garment performance classes are defined by minimum area requirements for both background material and retroreflective striping. Prior minimum requirements for background fabric prevented manufacturers from offering a true small-sized garment. The 2015 edition of ANSI/ISEA 107 includes a reduction in the minimum requirement for background fabric in only the smallest size garment offered by a manufacturer. This change will make small sized garments available to workers who previously were forced to wear garments that were too large for them in order to be compliant with the standard.

Previous Standard: Class 2 ANSI/ISEA 107-2010 775 Sq. In.

Current Standard: Type R Class 2 ANSI/ISEA 107-2015 540 Sq. In.

There has been an addition of garment types (O, R, and P) which address a wider range of occupations that should be in high visibility safety apparel.

ANSI CLASSIFICATIONS

ANSI/ISEA 107-2015 COMPLIANT SAFETY GARMENTS ARE CLASSIFIED AS FOLLOWS:

TYPE O CLASS 1 GARMENTS – intended for use in environments where there are struck-by hazards from moving vehicles, equipment & machinery <u>not</u> operating on public access rights of way or temporary traffic control zones.

Parking/Service location workers • Warehousing • Oil & Gas extraction workers • Refinery workers • Mining

TYPE R CLASS 2 GARMENTS – intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 2 garments require the use of greater amounts of high-visibility materials which help distinguish between a human and an inanimate object.

Forestry operations • Ship cargo loading operations • Roadway construction • Utility and railway workers • School crossing guards • Delivery vehicle drivers • High volume parking and toll gate personnel • Airport baggage and handlers/ground crew • Trash collection and recycling operations

TYPE R CLASS 3 GARMENTS – intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 3 garments mandate an even higher standard of visibility for workers in moving, complex backgrounds.

Roadway construction personnel and flaggers • Utility workers • Survey crews

TYPE P CLASS 2 & TYPE P CLASS 3 GARMENTS – intended for emergency responders and law enforcement personnel in environments with struck-by hazards from traffic operating on public access rights of way or temporary traffic control zones.

Police Officers • Sheriff • Fire responders • EMS

SUPPLEMENTAL CLASS E GARMENTS – pants, bib overalls, shorts and gaiters meeting minimum area requirements for background material and retroreflective trim. Class E apparel, however, cannot be worn alone to provide adequate visibility of workers. When Class E items are worn with Performance Class 2 or 3 apparel, the overall classification of the ensemble is Performance Class 3.

DISCLAIMER: Decisions regarding the use of protective apparel should be made by a qualified safety professional. VF Imagewear, Inc. manufacturers these products to the referenced specifications and does not make any representation or warranty as to their suitability or fitness for any particular use.

THE RED KAP® VISIBILITY LINE FEATURING RIPSTOP FABRIC is the ONLY ANSI COMPLIANT 65% POLYESTER / 35% COTTON FABRIC BLEND in the MARKET.

Industrial-friendly **RIPSTOP FABRIC** is **75% STRONGER** than other poplin workwear fabrics,

Nearly **35% More Breathable** and **15% Lighter Weight** than traditional 100% Polyester.

TOUCHTEX TECHNOLOGY** adds superior color retention, soil release and wickability.

Designed for unmatched durability, the cotton blend fabric provides a cool surface texture for additional comfort regardless of your activity. TYPE O-Class 1, TYPE R-CLASS 2 and TYPE R-CLASS 3 garments available that are ANSI/ISEA 107-2015 compliant.

1360 (Reg) S-3XL

Colors: Black (BK), Navy (NV), Royal Blue (RB), Red (RD)

1 HEIGHT

Stand straight against a wall without your shoes. Make a mark level with the top of your head. Measure from this point down to the floor.

2 NECK

Measure around the base of the neck where a collared shirt would fit, or measure a collar band on a shirt that fits you well.

3 CHEST / BUST

Measure the fullest part of your chest/bust. Hold the tape firmly, but not tightly. Be sure the tape is level and straight across your back. Stand naturally.

(4a) WAIST/MID-SECTION

First, remove your belt. Then, measure over shirt (not over pants) at 1/2" to 1" below the navel. Hold the tape firmly but not tightly. If pants are worn under a protruding abdomen, measure where pants are typically worn. Note: For women, please refer to the hip measurement as the key point of measure for fitting pants.

(4b) WAIST/MID-SECTION

For shirts and covering garments such as coveralls - measure midsection over clothing around the fullest part of the abdomen. Note: Include both "A" and "B" measurements if ordering multiple garments.

(5) HIPS

Stand with your heels together. Measure around the fullest part of the hips. Hold the tape measure straight and level.

6 INSEAM

Standing straight, measure the distance from the crotch to just below the ankle bone. OR – using similar style pants that fit you well: lay garment flat with front and back creases and smooth. Measure along the inside seam of one leg from the bottom of the hem to the crotch.

7 SLEEVE

Bend the elbow slightly. Start at the center back of the neck and measure across the shoulder to the elbow and down to the wrist bone.

(8) TRUNK

Measure from base of neck (front) down around crotch and back up to the bottom of the collar. (For coveralls only)

(9) CAP / HAT SIZE

Measure the circumference of the head at it's widest diameter, approximately 1/8" above the ears.

FRONT - This is the distance from the center front at the top of the waistband to the intersection of the crotch seams. **BACK** - This is the distance from the center back at the top of the waistband to the intersection of the crotch seams.

(11) ACROSS SHOULDER

While standing with arms down, measure across the back from one shoulder joint to the other.

12 UPPER ARM / BICEP

Measure the maximum circumference of the upper arm just below the under arm.

(13) FOREARM

Measure the maximum circumference of the forearm at approximately 6" above the wrist.

(14) WRIST

Measure the wrist circumference over the wrist bone.

(15) THIGH

Measure around thigh (parallel to floor), below crotch.

16 KNEE

With the leg straight, measure the knee circumference over the knee cap and parallel to the floor.

① CALF

Measure the circumference of the largest part of the lower leg approximately half way between the knee and ankle and parallel to the floor.

(18) OUTSEAM

Measure along the outside of the leg from the top of the waistband to the bottom of the hem of just below the ankle bone. OR - lay garment flat, measure along outseam from top of band to bottom of hem.

(19) OVERARM

With arms at the sides, measure around the broadest part of the shoulders and upper arms, keeping the tape level at all times. If overarm measurement is more than 7" larger than chest measurement, go up one size.
